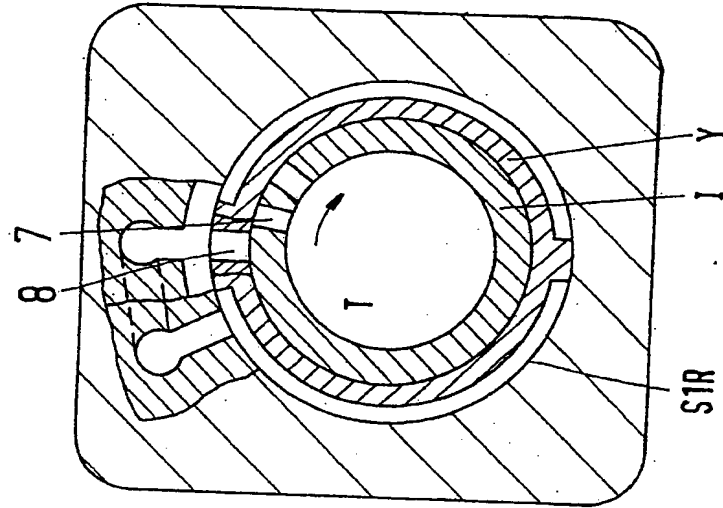

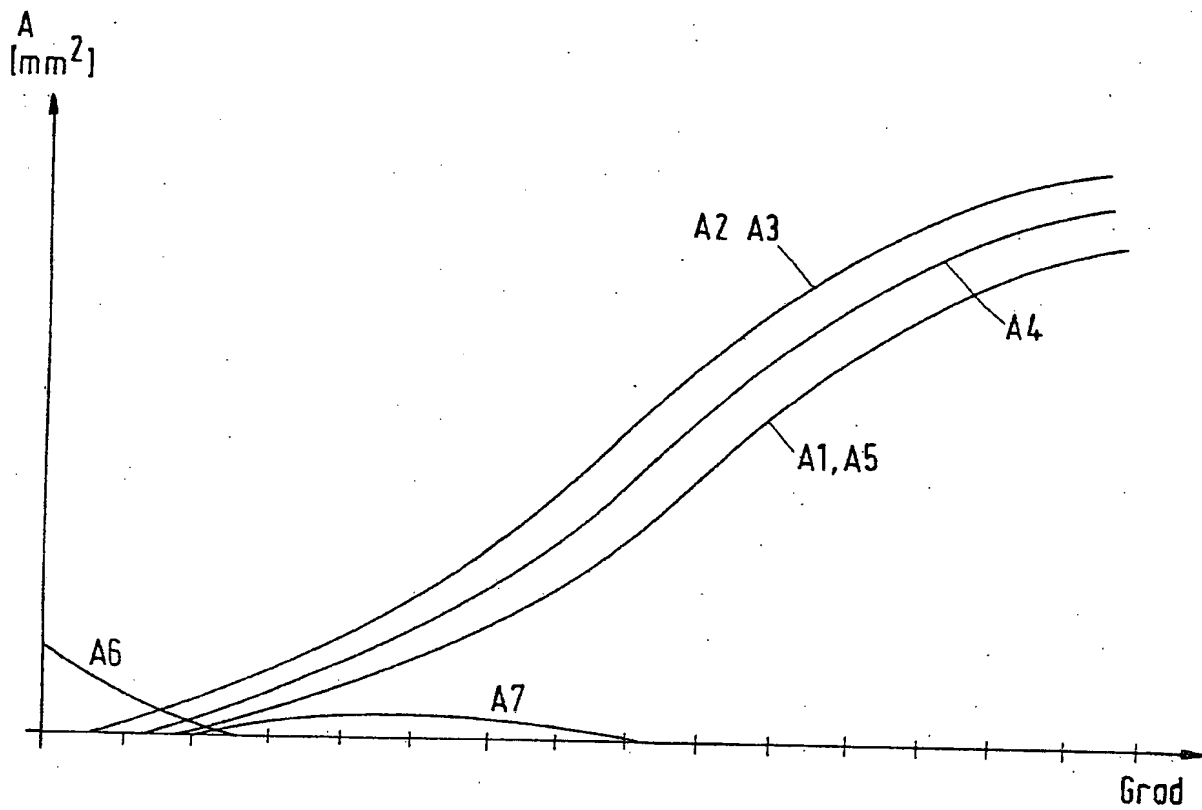

Fig.7

The diagram shows a vacuum tube circuit. At the top, a transformer (3) is connected to a power supply section. The power supply section includes a rectifier (4) and a filter capacitor (5). The power supply is connected to a vacuum tube (2) via a series of resistors (A1, A2, A3, A4, A5, A6, A7) and a variable capacitor (6). The vacuum tube is connected to a speaker (7) and a tuning coil (8). The circuit is labeled with various components and their connections.
